Profile

As a frontend developer with 1.5 years of experience working with Tailwind, Redux, JavaScript, React, and TypeScript, I'm committed to delivering high-quality work while staying up-to-date with the latest industry trends. While I'm not the most experienced developer, I'm passionate about learning and growing, and I'm dedicated to giving my all to every project. I'm always looking for new challenges that can help me expand my skill set and take my expertise to the next level.

Skills

JavaScript

Proficient in JavaScript and its modern frameworks for developing dynamic and responsive web applications with a focus on enhancing user experience.

Typescript

Experience in utilizing typescript with a focus on ensuring type safety and increasing code reliability.

Tailwind CSS

Framer Motion

React

Proficient in React for web app development, including UI creation and state management, with a focus on delivering high-quality results.

NodeJS

Experienced in building server-side applications using Node.js, with a focus on creating efficient and scalable backend systems.

Redux

React Query

Education

Federal University Of Technology, Owerri 

Nigeria

Projects

Space Tourism site

I completed a frontendmentor.io challenge and built a space tourism site. I Implemented responsive design and efficient state management techniques. I was also able to gather stronger experience with tailwind css building this project.

Admin Dashboard

Built an admin dashboard frontend site by following a step-by-step tutorial on YouTube, utilizing React to create a dynamic and user-friendly interface for monitoring and managing system data. Gained valuable experience in implementing third-party components and libraries, and finally got a good understanding of how to use react context.

Wind-BnB

Built a responsive web application for house hunting for short stays, allowing users to search and filter through a database of houses.
